

RISHI MUNI KESARWANI

Technical AI Product Manager · Agentic Systems

Gr-Noida, India | +91 87078 92507 | rishi.rte@gmail.com | linkedin.com/in/imrishirich93

SUMMARY

Enterprise B2B commercial leader moving into Technical AI Product Management — shipped agentic workflows, grounded retrieval, evaluation and guardrail design, and human-in-the-loop approval. Nine years owning revenue, pricing and technical-commercial delivery. IBM AI Product Manager certified.

AI PROJECTS

RAG Bookshelf — Cross-Book Synthesis Engine

LangChain · ChromaDB · BGE-M3 · Gemini

- Retrieval-augmented pipeline over 14 AI and product books (1.6M words, 2,844 passages); embeddings run on-device so retrieval is free and offline, with one paid model call per question and the model version pinned in a single config file to prevent runaway spend.
- Benchmarked three retrieval strategies before choosing one; ruled out plain similarity after its worst case collapsed to 2 of 14 books, defeating the cross-book synthesis goal.
- Designed a two-tier evaluation framework — retrieval hit-rate, plus claim-level recall and hallucination rate against a full-context baseline with judging split across models to control self-preference bias. Every claim cites its source book or the system declines to answer; decisions and reversals kept in a timestamped log.

What Is Hot? — Agentic News Pipeline

Hackathon winner, built in under 5 hours · Shipped

- Reads 16 tech sources per run and prints one newspaper. Four-layer web-automation architecture moving from live browser interaction to persistent site memory to deterministic CLI commands — layers 2–3 remove model-token cost by replacing repeated reasoning with compiled workflows.

The Job Qualifier — Evidence-Grounded Screening Agent

Hermes · Shipped & running

- Scores a role against a verified profile and reports plainly where I do not qualify. Anti-fabrication guardrail: every claim must trace back to corpus evidence or it is flagged.

Investor Research & Outreach — Two-Agent Pipeline

Hermes · Pre-deployment

- Turns a pitch deck into a ranked list of matched investors with verified emails, then drafts the outreach. Confidence sets autonomy — strong matches queue a draft, borderline escalate to a human, weak never surface; irreversible sends need a second confirmation.

SKILLS

Agentic AI architecture, RAG and grounded retrieval, LLM evaluation and guardrails, Vector databases (ChromaDB), LangChain, Cost and latency trade-offs, Human-in-the-loop design, Problem discovery, Roadmap scoping and prioritisation, Market analysis

EXPERIENCE

Product & Business Advisor (pro-bono) — Aayo App

Delhi NCR · Dec 2025 – Present

- Built the monetisation model — 10% transaction commission plus five supporting streams — and sized TAM-SAM-SOM against Luma, Meetup, Eventbrite and BookMyShow, the work behind the deck's ₹1 Cr ask. Cut roadmap scope to MVP against 3 engineers and 9 months of runway; platform reached 1,100+ organic users and 90+ events on zero marketing spend.

Sales Manager, Industrial Automation — VINCI Energies (Actemium)

Bengaluru · Jul 2024 – Nov 2025

- Owned revenue and delivery end-to-end across South India — pricing, techno-commercial offers, and coordination through engineering, operations and supply chain; revived 10+ dormant accounts back into qualified pipeline.

Senior Sales Engineer & Key Account Manager, USA + Europe — TD Power Systems

Bengaluru · Feb 2022 – Jul 2024

- Grew Fincantieri revenue 70% through weekly progress reviews and full spec-change traceability — a compliance bar that had disqualified most competing suppliers. Owned 7 export key accounts including Solar Turbines, Siemens and Turboden, from close through order-to-cash.

Sales & Estimation Engineer — JC Industries

Bengaluru · Feb 2018 – Feb 2022

- Doubled revenue in one year by opening a government-tender pipeline from nothing; owned pricing end-to-end, from tender scope and bill of materials to compliant, margin-protected bids.

Co-founder — Siddhi Vinayak Infra-Ventures, concrete-block manufacturing

Prayagraj · 2017 – 2018

- Raised the project finance, sold the product and ran the plant; won municipal-corporation and housing-society contracts.

EDUCATION & CERTIFICATIONS

IBM AI Product Manager Professional Certificate · IBM RAG and Agentic AI

Coursera · 2026

Global PGP in Startup Leadership — Launch Pilot School of Business (Woolf University affiliate, ECTS)

Jan 2026

B.E. Electrical & Electronics — Visvesvaraya Technological University, Belgaum · 76%

2012 – 2016
